BPB100
BLEUETOOTH PANIC BUTTON

BIOSTURK

TECHNICAL SPECIFICATIONS:

- **Data Rate: 2Mbps**
- **2,4GHz**
- **BLE4.0**
- **Distance: 10-100m**
- **Power:**
  - 900nA (Deep sleep)
  - 11,3mA @ 0dBm TX
  - 12,3mA @ 2Mbps data rate RX
- **TX Power: 0 dBm**
- **Sensitivity: <90dB**
- **Battery Life: 2 Years**
- **Dimensions: 82 x 80 x 55 mm**
- **IP67**
- **Operation Temp: -20ºC to +80C**
- **Internal antenna**

It is a panic button that can be connected wirelessly to our vehicle tracking unit via Bluetooth.

It is used in public transportation vehicles such as buses and minibuses to notify the control center in case of an emergency such as an attack on the driver or a sudden fainting of the driver.

For fixed applications, MTL32 and MTL200 can be used with IoT GW.
